

INTEGRATING FAMILY SERVICES

Regional Readiness Mapping Template

This template is referenced in step #7 of the Integrating Family Services *Regional Readiness Guidance and Tracking* document. It is a tool that the IFS regional exploratory or established governance team in your region may want to use to help establish a clear and shared understanding of the strengths, opportunities, gaps and complicating factors that will need to either be factored into a decision to move forward with IFS implementation or accounted for in your IFS regional strategic plan.

Region: _____

Contact Person (for any follow-up questions): _____

STRENGTHS/ASSETS <i>These include existing attributes related to people, resources, systems, etc., in your region that are working well and you believe can be leveraged to move IFS forward.</i>	OPPORTUNITIES <i>These are areas where you see untapped potential for change and/or an openness to approach human services delivery differently.</i>	GAPS <i>These can include any kind of gap or program/organizational weakness that you believe needs to be factored into your decision and/or your IFS strategic plan.</i>	COMPLICATING FACTORS <i>These include anything that you believe could undermine, hinder or present a challenge to implementation of the IFS model.</i>
<i>Example: CIS governance agreement is operating effectively and can be used as a foundation for expanding integration.</i>	<i>Example: ADAP prevention grant will add community capacity to assess needs and implement substance abuse prevention activities.</i>	<i>Example: There is a huge unmet need for local, accessible substance abuse treatment.</i>	<i>Example: There are many active groups, coalitions, etc. in our region that have a focus on children/youth and/or families, but there is a lot of overlap and redundancy.</i>
